

ROTARY FILLER

The rotary filler has the advantage that large amounts SpoutBags can be filled while the machine is relatively quiet running. By using this principle you have to deal with few moving parts so little wear resulting in longer life time.

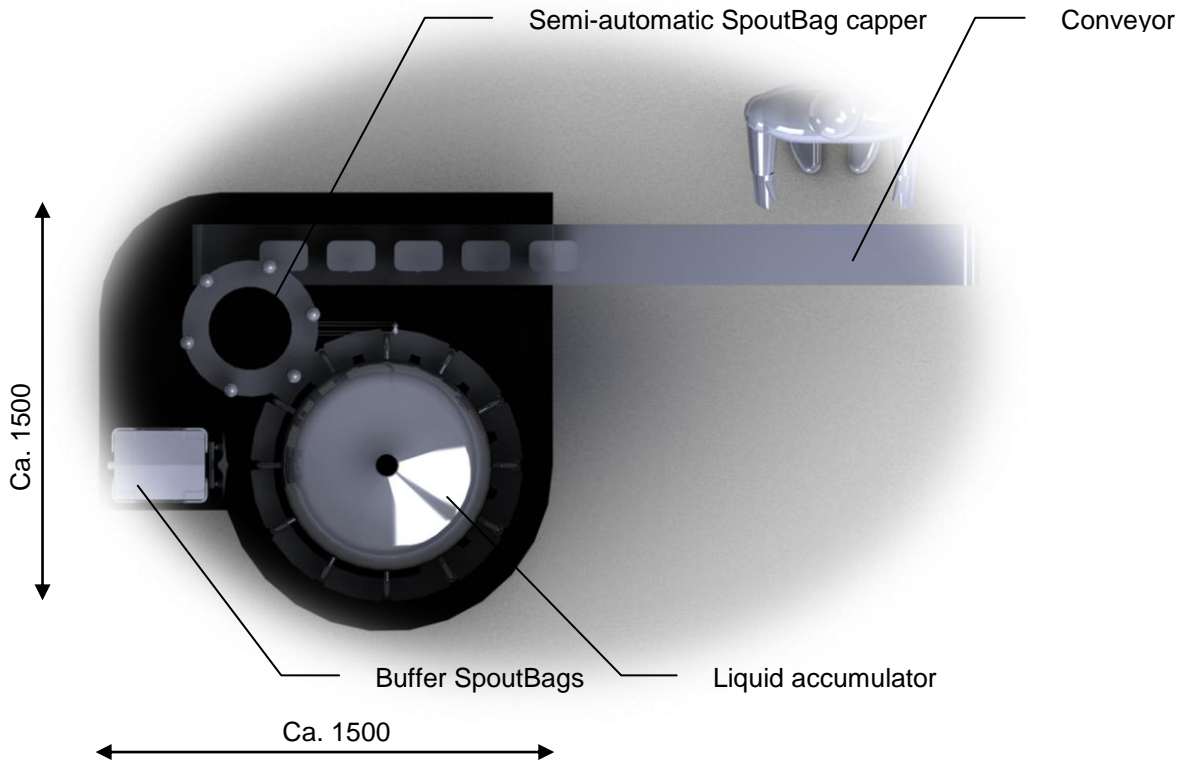

The rotary filler is equipped with a pick and place unit. The pick and place unit places the SpoutBag quickly and accurately into the rotary filler.

BOUWPACO

Packaging Equipment b.v.

Features:

- Compact and complete machine;
 - Pick and place unit SpoutBags;
 - Automatic filling system;
 - Semi-automatic SpoutBag capper.
- Easy to clean;
